

Per-night flux decomposition — WienerNet separates an interpretable physics drift (smooth respiration  $R_{eco}(T)$ ) from calibrated aleatoric noise (top); the no-physics black box gives only one opaque predictive band (bottom)

2022-06-07 ( $E_0=238, r_b=6.5$ )

2020-12-14 ( $E_0=218, r_b=4.0$ )

2022-01-16 ( $E_0=400, r_b=4.1$ )
